

Do you look after a campsite? Is your broom still up to the job?

If you have broken or worn out equipment at your campsite then please go ahead and replace it – walkers will appreciate it!

- Bannister brush
- Dustpan – metal is recommended to be used when clearing out fire pit
- Broom (long handle, soft bristles) for bed boards – metal handle recommended (or at least plastic) as wooden ones get added to the fire
- Leaf rake – also with a non-wooden handle
- Plastic tub for log book/red register – only needs to be big enough to fit the books and some brochures ie. fairly shallow. We want to dissuade walkers from leaving food/equipment behind.
- A plastic tub for overnight storage of food to protect it from animals is not a standard campsite accessory. They have generally been provided at shelters with particular problems with rodents; sometimes by the P&WS and sometimes by the volunteers. Again, minimal opportunity for walkers to leave rubbish behind is desirable. You may get one if you think it is necessary (Tip: read comments in the log book/register to see if scavenging has been experienced).

Get good quality plastic items so they last as long as possible; the best way to reduce plastic waste when it must be used.

You may request reimbursement. Please email or post your request to our Office Manager, Ce Kealley:

- (a) within 30 days after the expense is incurred; and
- (b) supported by proof of the expenditure (e.g. receipts) showing the following —
 - the actual items purchased;
 - the date;
 - GST if applicable
- (c) provide your full name and bank account details for transfer of funds
